About the Project

Project Scope: The Eola Connector is a nearly 4,200 foot long trail that will safely and efficiently increase connectivity within the DuPage County trail network. The project will consist of a 10-foot-wide, asphalt paved, shared-use path to be built from Mustang Way to the Batavia Spur. The project will include widening of the Eola Road bridge over I-88 and will feature connections to Metea Valley High School, the DuPage Technology Corridor Trail, and the Illinois Prairie Path via the Aurora Branch and the Batavia Spur. This project will require right of way acquisition at certain locations along Eola Road.
ILLINOIS PRAIRIE PATH - EOLA CONNECTOR
AURORA BRANCH TO BATAVIA SPUR

SUMMARY OF IMPROVEMENTS

- Connection to DuPage Technology Corridor Trail and Batavia Spur
- Replacing sidewalk with 10-foot path
- Widening Eola Road bridge over I-88 to accommodate Path
- Connection to Aurora Branch
- Connection to Metea Valley High School
- Temporary construction easements & proposed right of way will be needed to accommodate improvements
